

stacosystems™

Customized Power Products for

MILITARY & DEFENSE APPLICATIONS

POWER
P R O D U C T S

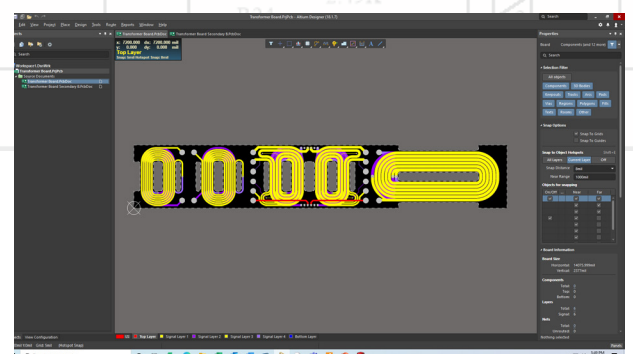

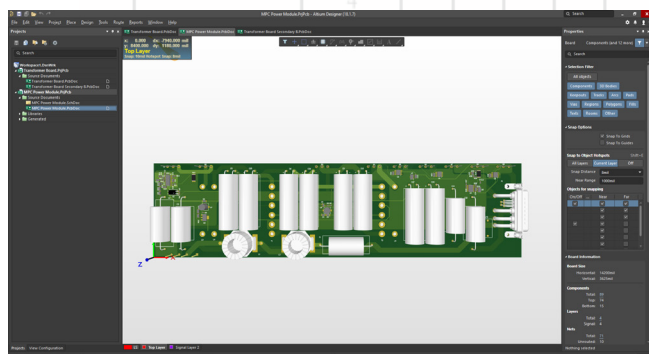

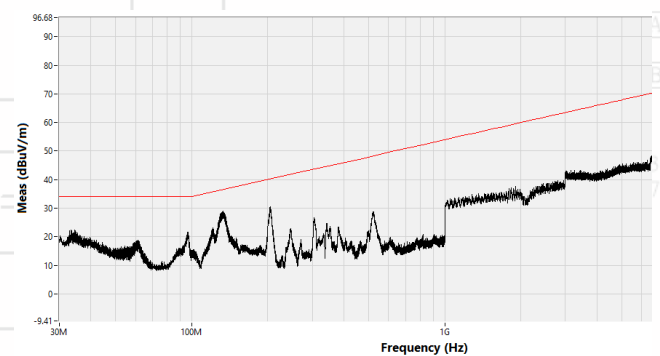

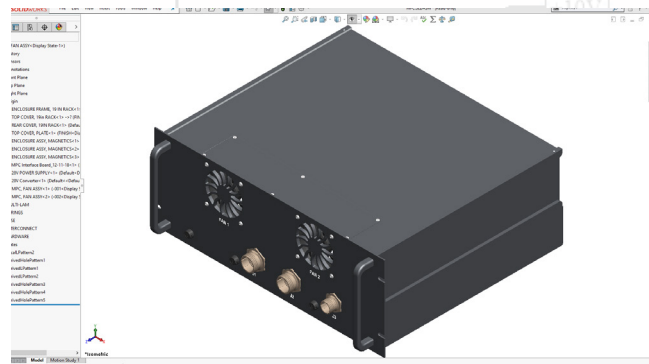

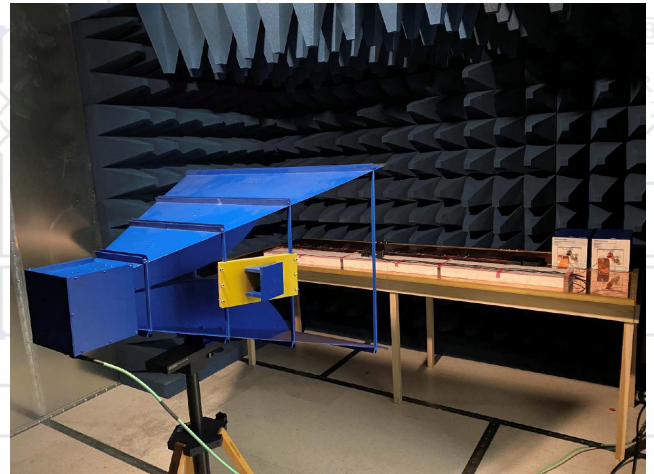

Power, we have the capabilities.

Staco Systems' design and production capabilities are second-to-none when providing ruggedized custom power solutions to military and defense customers.

Our decades of expertise working with mission critical systems has provided our team with all the experience and resources necessary to support our partners with reduced time-to-market results on some of the most complex custom design projects. Supporting collaboration on concept development to rapid prototyping, through military and commercial qualification such as MIL-STD-461, MIL-STD-704, MIL-STD-810 and DO-160.

Our in-house capabilities are:

- AS9100
- 3D CAD Modeling
- PCB layout
- Assembly & Test
- CNC
- Stamping
- Molding
- Paint
- EMC Test Lab
- Environmental Test Lab

With a full suite of CAD software, in-house fabrication, environmental testing equipment, and an EMC lab, our engineering team can model, build, and test through the design and development phases to ensure compliance at the final qualification test stage.

After qualification, Staco can then turn to our production team to have the system manufactured in our AS9100 certified manufacturing facility. Staco Systems is ready to help your team with the design, development, and delivery of your power project.

Here are some examples of our Power capabilities:

Power Converters:

- DC to DC
- AC to DC
- DC to AC Inverters
- AC to AC Frequency Converters

Power Distribution:

- Circuit Breaker Panels
- Interconnect Boxes

Staco Systems also offers off-the-shelf flight qualified USB-ready chargers.
